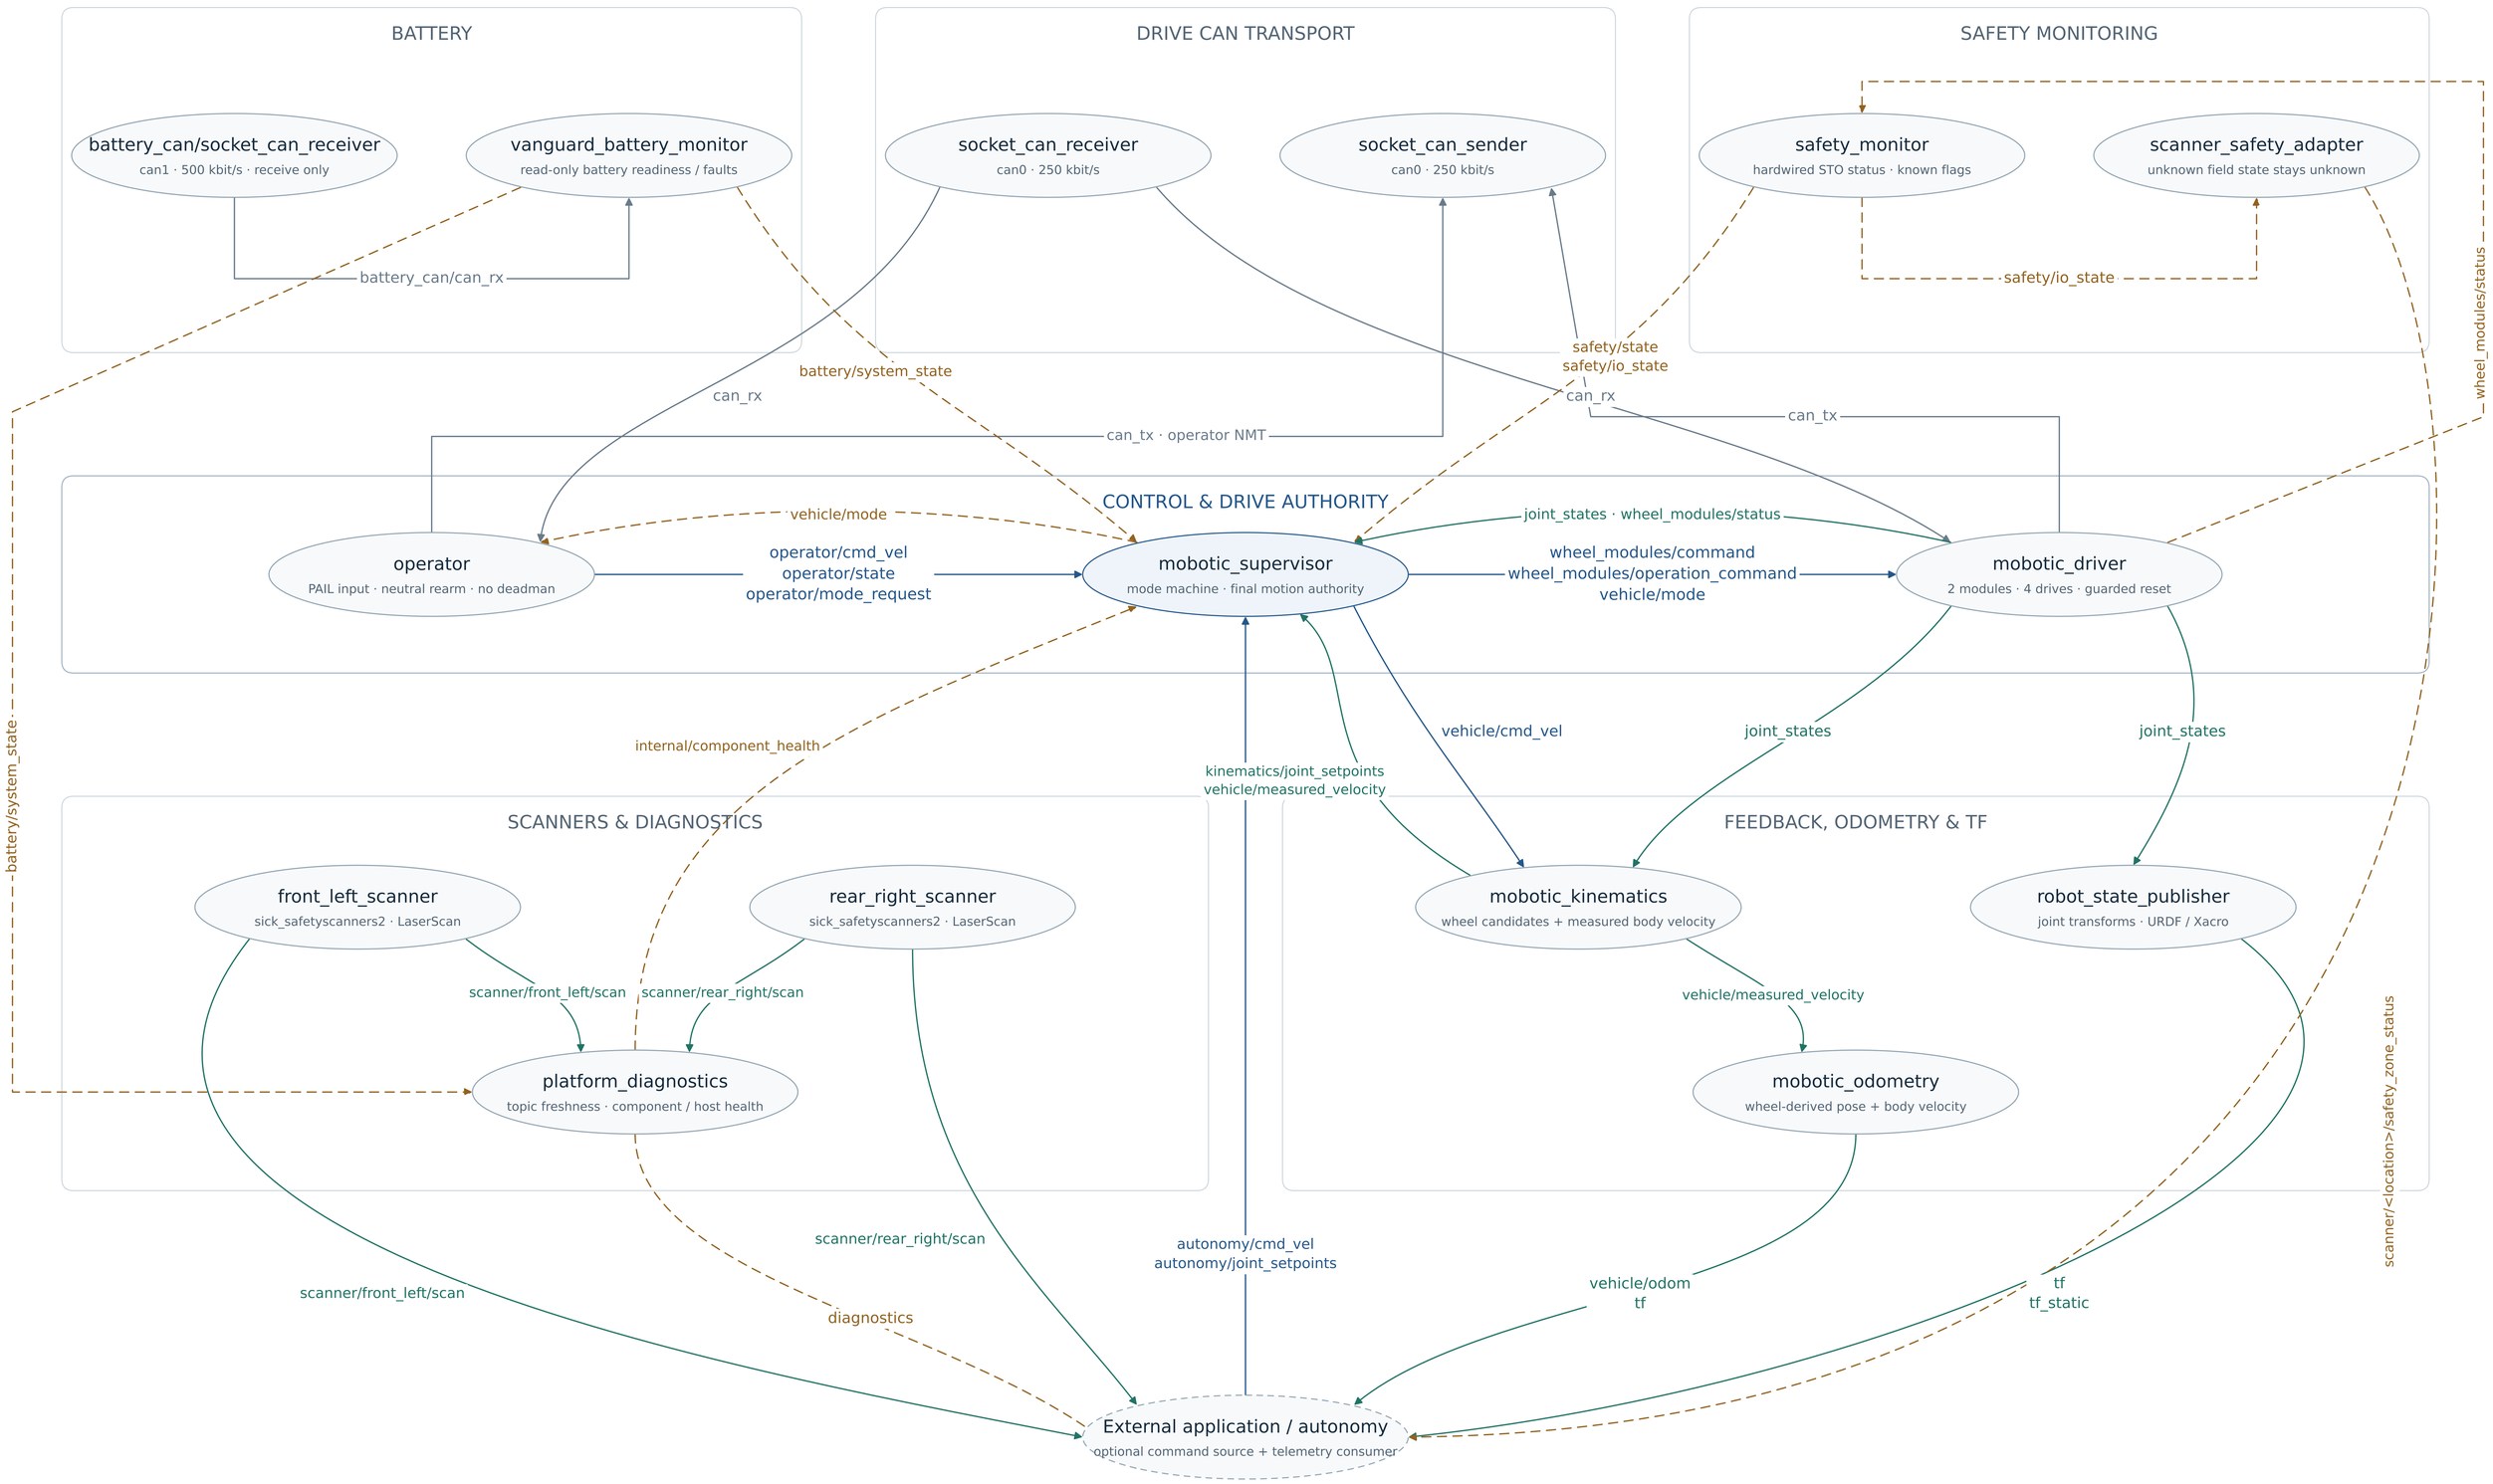
MoboTerra | connected ROS 2 graph

Two-module hardware profile · front_right + rear_left · PAIL / Ecobox · /moboterra

Each node appears once. Blocks group related nodes; arrows connect the complete graph. Source-derived, not a live capture.



Blue: commands Teal: measured data Dashed amber: state / health Gray: CAN transport

15 hardware-stack nodes + 1 optional external application · one connected graph · each node appears once

Main connections shown; secondary monitoring fan-out, services and leaf/debug topics omitted. Siemens scanner / STO wiring is independent of ROS.
